Professional Summary :-

Frontend Developer with 2+ years of experience specializing in Next.js, React.js, and TypeScript. Proven expertise in architecting scalable, bilingual (AR/EN) web platforms, including complex booking engines and e-commerce systems. Adept at implementing fault-tolerant JWT authentication flows, advanced state management, and integrating third-party APIs such as AI models (Google Gemini) and interactive maps. Demonstrated ability to deliver high-performance, secure, and user-centric applications.

Skills:-

Core Technologies: Next.js , React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3.

Authentication & Security: JWT , OTP Authentication , Clerk, Kinde , Firebase Auth

API & Integrations: Axios , RESTful APIs, Google Gemini AI, Open Router API , i18next , Leaflet, MapLibre

Styling & UI Components: Tailwind CSS, Bootstrap 5, shadcn/ui,.

State Management: React Context API.

Tools & Testing: Vite, React Router DOM, Git & GitHub, NPM, Postman

---

Work Experience

Frontend Developer | H2M - Cairo, Egypt (On-site) | June 2024 - June 2025

Developed reusable UI components with React.js, Tailwind CSS, and Context API.

Built an AI-integrated chatbot with Google Gemini for real-time user interaction.

Reduced page load time by 25% and improved accessibility across 5+ projects.

Frontend Developer (Freelance) | May 2024 - Present

Delivered scalable web apps for 4+ clients using React.js, Next.js, and modern UI/UX practices.

Integrated real-time data with RESTful APIs and implemented secure authentication (Firebase , Clerk, Kinde).

Applied performance optimization (lazy loading, code splitting), improving speed by 20–30%.

Projects:

EGIV — Gaming Rooms & Entertainment Booking Platform
Tech Stack Next.js 16 · TypeScript · Tailwind CSS · OpenRouter AI · JWT · i18next - shadcn/ui

Key Contributions:

Architected a multi-step booking engine with wallet payments and tax automation, backed by a 10+ module API.

Engineered an AI tool (Open Router /Gemini) analyzing room images to generate localized architectural design recommendations.

Implemented fault-tolerant authentication with proactive JWT refreshing via Axios, ensuring uninterrupted user sessions.

Developed a fully localized bilingual interface (AR/EN) with dynamic RTL/LTR layout switching.

Integrated Leaflet maps for precise deliveries and automated QR codes for secure booking confirmations.

Al-Watanya — Bilingual E-Commerce & Wholesale Platform

Tech Stack: Next.js 16 · TypeScript · Tailwind CSS · React Context · Axios · Leaflet- JWT - i18next - shadcn/ui

Key Contributions:

Architected a dynamic cart and multi-step checkout system with wallet payments and real-time fee calculations.

Implemented secure OTP authentication featuring proactive JWT refreshing via Axios to ensure uninterrupted sessions.

Engineered a scalable multi-context state system optimizing cart management and dynamic RTL/LTR layout switching.

Developed a specialized wholesale onboarding flow with secure document uploads utilizing FormData API requests.

Integrated Leaflet mapping for precise user geolocation and efficient location-based delivery address management.

Beyond Square — Bilingual Workspace Booking & Rental Platform

Tech Stack Next.js 16 · TypeScript · Tailwind CSS · MapLibre GL · JWT · i18next - shadcn/ui

Key Contributions:

Architected a multi-step booking system managing hourly/daily rentals, automated taxes, and wallet payments.

Implemented proactive JWT refreshing with request queuing, ensuring uninterrupted server-client sessions.

Integrated MapLibre GL for an interactive workspace discovery map featuring localized markers and smart bounds.

Engineered a real-time chat interface and a dynamic reservations dashboard with server-side data filtering.

Developed a fully localized bilingual interface (Arabic/English) with persistent RTL/LTR layout switching.

Education :

Front-End Web Development Diploma SEF (Software Engineering Future)
Completed Jan 2024 – Duration: 4 months – Score: 94.64%

Frontend Internship Certificate – SEF (Software Engineering Future) *Completed Oct 2024*

Languages Arabic: Native English: Good
